

Innovations Academy

K-2 Home Learners Community Class

Tuesdays and Thursdays

Come join us this September at Innovations Academy for a NEW Home Learners Class for Kindergarten through 2nd grade students. Homeschooled children will join their peers to create a community of learners. They can choose optional centers to create art, write stories, play math games and build structures. We will also come together as a group to experiment with science, do yoga, create projects, sing, dance, and play. We will share what we are learning at home and investigate the world together. Student and parent input will guide the direction the class will take.

The class will be held at Innovations Academy in the Mission Gorge - Fairmount area. If you are interested or have questions, you can contact Donna in the Innovations Academy office at (619) 501-6327. You can also contact Jill, the teacher, at Jill@innovationsacademy.org or (619) 838-2207.

Jill Keltner will be leading the class. She is a credentialed teacher who has been homeschooling her children for four years. She has worked in the field for education for over 25 years as classroom teacher, yoga teacher, gymnastics teacher, carpentry teacher, tutor, homeschooling parent, co-op preschool parent-teacher, and camp counselor.
