COR863002

Item no. COR863002-0403	
General Product Information	
Dimensions LxWxH	26'8" x 23'2" x 13'4"
Age group	5 - 12
Play capacity (users)	52
Color options	

It's a jungle of fun! Amazing meandering nets, ropes and wobbly play items make the play of older children unstoppable. The spacious top net is a desired meeting point for huge groups of children. The ways to climb and reach the multiple play/levels are many: via nets, wacky tubes, rope ladders, play shells or coconut ropes. This rich variety of climbing, crawling

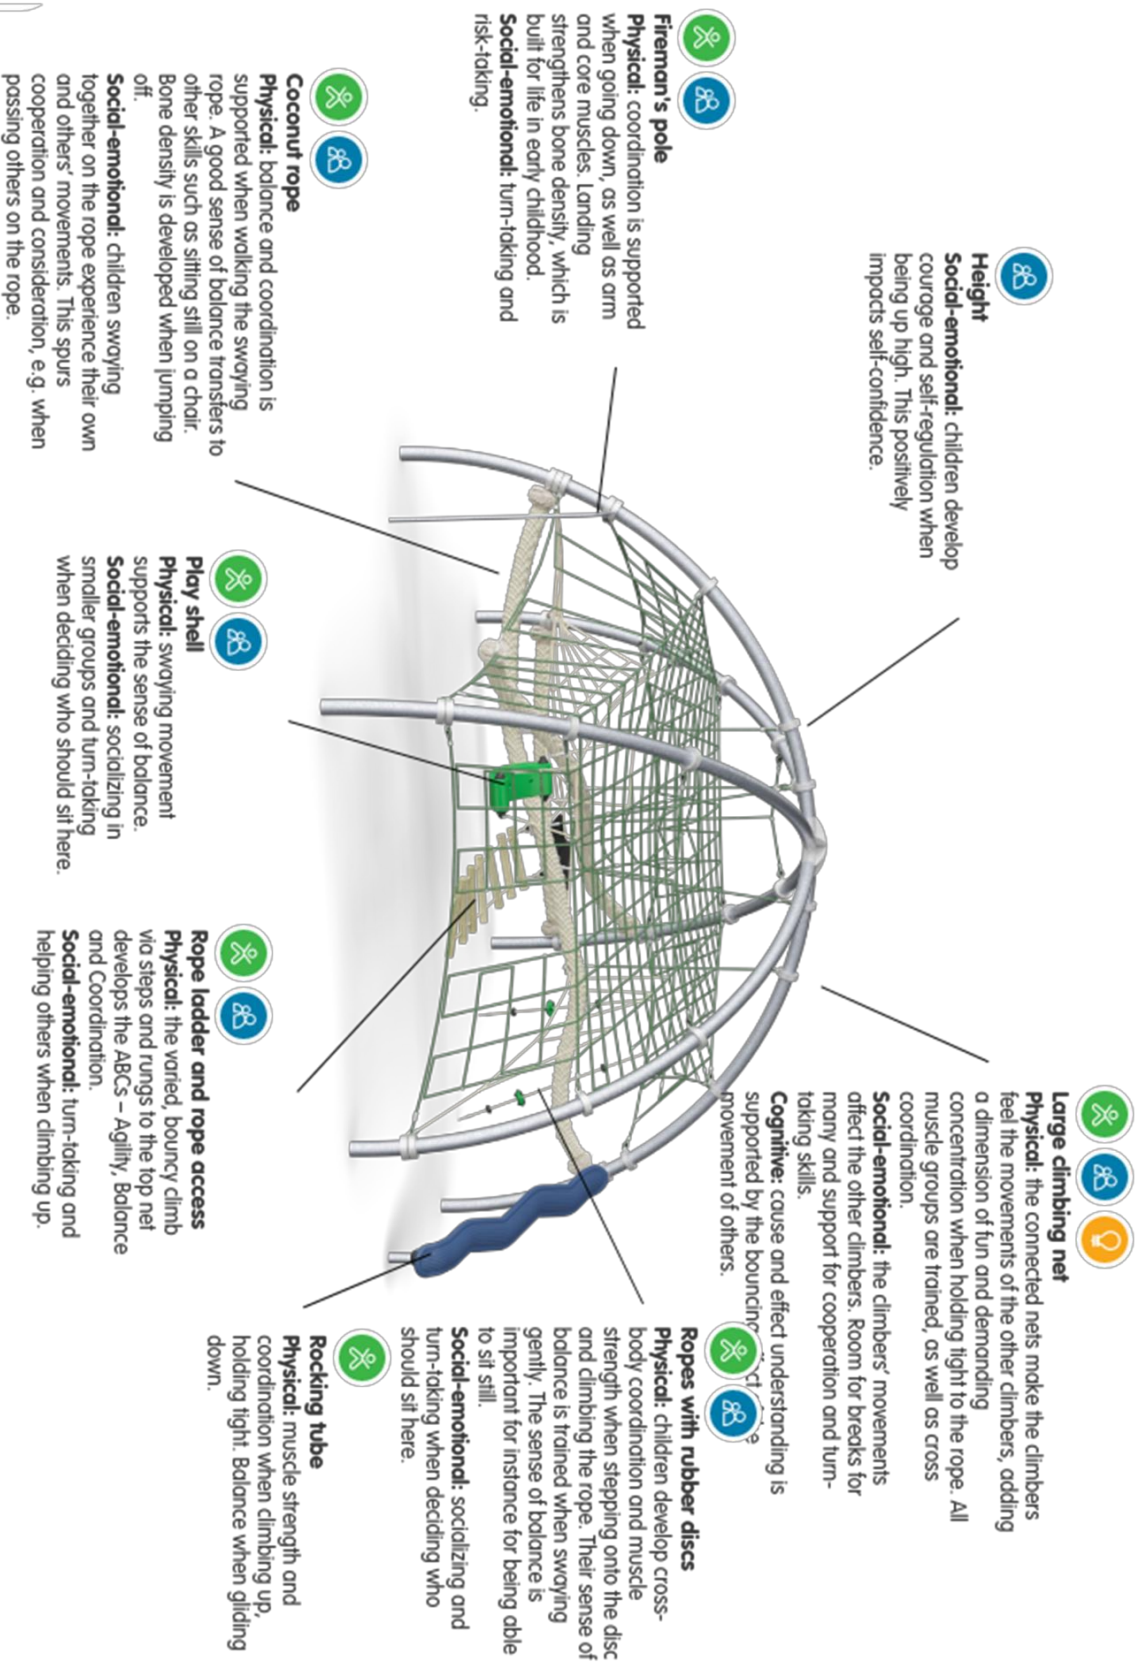

and balancing make children come back again and again to refine and improve their previous attempts at climbing the nets. The multitude of twisted, bouncing balancing and climbing events intensely support children's motor skill ABC's: agility, balance and coordination. Spatial awareness is stimulated due to the transparency of the structure. This also makes

social interaction easy. Socializing, turn-taking and empathy are social-emotional skills for life. In the Explorer Dome they come to use repeatedly.

COR863002

The PP rope in coconut style has a diameter of 15cm. The internal steel wire core has thimbles at both ends, which serve as attachments for the rope to existing connecting elements.

Corocord aluminum clamps are used as connectors between steel posts and rope. Two aluminum castings are bolted together. The height of the clamps is thus variable.

The large components are made of 100% recyclable PE. The play shell displayed is moulded in one piece with minimum 5mm wall thickness to ensure high durability in all climates around the world.

Corocord ropes with 19mm diameter or more are special 'Hercules'-type with galvanized six-stranded steel wires. Each strand is tightly wrapped with PES yarn, which is melted onto each individual strand. The ropes are highly wear- and vandalism-resistant and can be replaced at site if needed.

Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector: safe, durable and vandalism-proof, all while allowing the typical movement of rope play structures.

Through the KOMPAN Variant Team, you can choose between additional 7 rope colors and customize your solution. The assortment is a wide span of colors ranging from elegant and expressive black or a natural, neutral hemp color, to a range of attractive and eye-catching signal colors.

Item no. COR863002-0403	
Installation Information	
Max. fall height	9'10"
Safety surfacing area	1.095 ft <sup>2</sup>
Number of installers	2

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Validation of CO2 calculation of play module Item no. PCM200309-0010.

Data version no. 2021-01-11

The CO2 calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the play module item no. PCM200309-0010. (Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 25. January 2021

Validated by:

Bente Nesting, Senior Consultant

Peter Bendisen, Senior Consultant

Validation based on report: Validation of CO2 calculation of play module – Kompan, version 1.0, prepared by: Bureau Veritas HSE, Denmark; Bente Hviid Nesting and Peter Bendisen
